

Cleaning of the Marsh Green War Memorial

The Parish Council wishes to inform residents that the **Marsh Green War Memorial** will undergo scheduled cleaning and preservation works in the coming days. This forms part of our ongoing commitment to maintaining the memorial as a respectful and well-kept focal point for remembrance within the village.

Specialist contractors will carry out a **gentle DOFF steam clean**, followed by a **biocidal treatment** designed to slow the return of algae and lichen. These conservation-grade methods ensure the stone is cleaned safely without damage to the historic fabric.

Access to the **fenced grassed area surrounding the memorial**, may be temporarily restricted while the works are in progress. The contractors will ensure the area remains safe for residents at all times.

The Parish Council appreciates the community's understanding while this important maintenance is completed. The memorial is a valued part of Marsh Green's heritage, and these works will help preserve it for future generations.

If you have any questions, please contact the Parish Clerk.
